

How to make Terrance Ears!

STEP 1:

CUT OUT THE EARS!

Make sure you don't cut off the white tabs connected to the bottom of the ears. Those are important!

STEP 2:

MAKE YOUR HEADBAND!

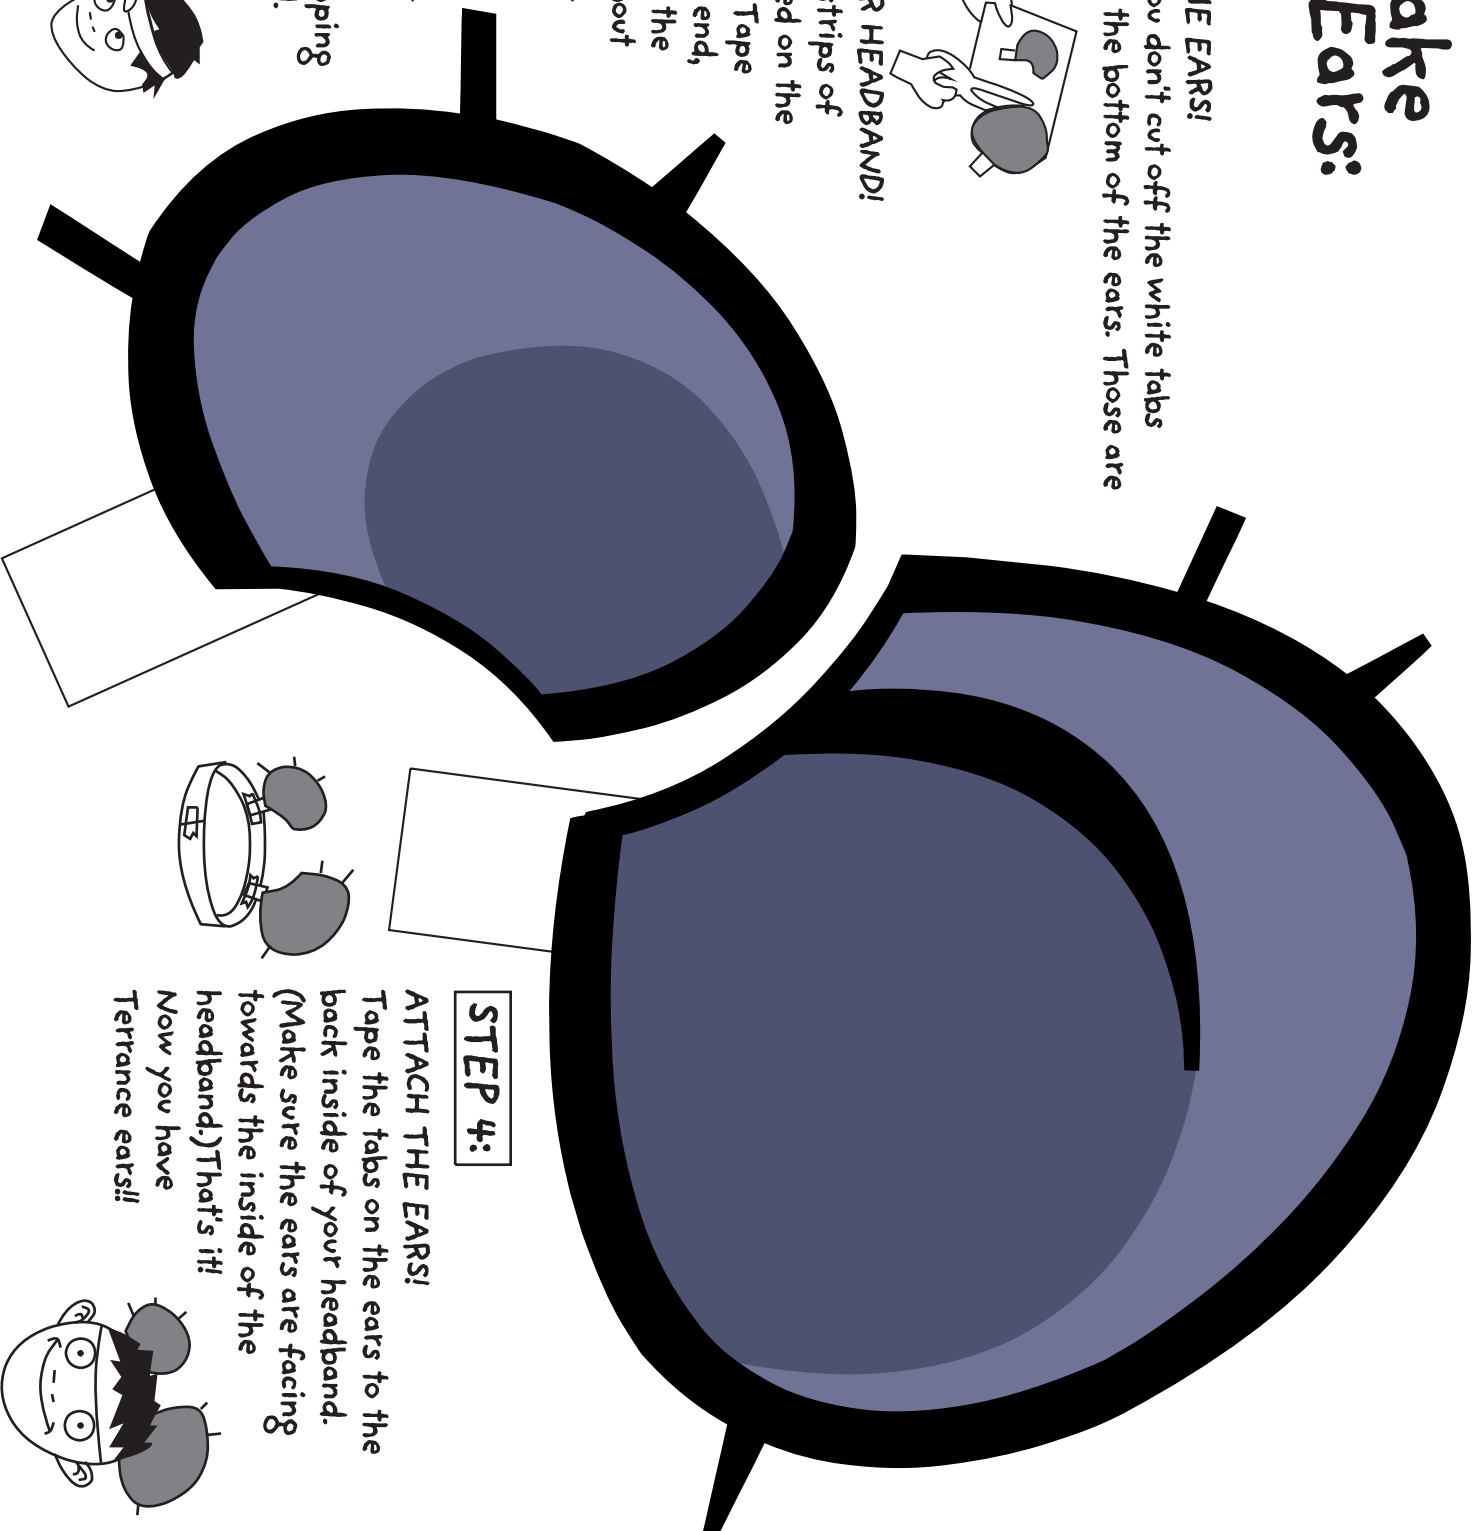

Cut out the strips of paper marked on the other sheet. Tape them end to end, overlapping the pieces by about half an inch.

STEP 3:

SIZE YOUR HEADBAND!

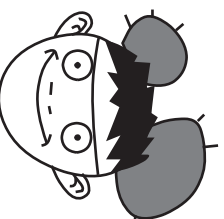

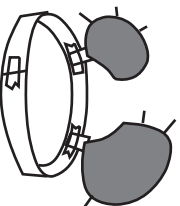

Take your taped-together paper strip and wrap it around your head, overlapping the ends at your forehead. Hold the ends together and slip it carefully off your head. Tape the ends together at the spot you were holding it.

STEP 4:

ATTACH THE EARS!

Tape the tabs on the ears to the back inside of your headband. (Make sure the ears are facing towards the inside of the headband.) That's it! Now you have Terrance ears!!

Headband Strips

You probably won't need more than three of them, but go ahead and cut out the fourth one to have just in case.
